Interview of survivor.

I interviewed a young lady (she was in the crash) and I asked her 2 questions. The first question was: did you see the dead body and she replied "no because people were crowding round, and I managed to walk away but I waited for the police to come." and the answer to my other question was, "I will never go on a tram again on my own but I will go with friends/family."

TRAM TERROR!

Miss L Parker and another woman died.
Miss Parker died in hospital, though fighting for her life.
The other woman that died, died when the tram crashed.
Sixteen of the other passengers were injured but they survived .
What happened, you may ask? The tram was going up Bearwood Hill and it stopped at one of its regular stops and started rolling backwards. We got in touch with the driver and he said, "I tried all the buttons I could get to, the brake wouldn't work, in the end I just gave up, but I regret that now because poor Lillian and that other woman died. If I could I would go back and make me who died." -

CRASHED TRAM.

Normal tram (not crashed)
